

Hawaiian Electric Company

Home Energy Challenge
2011/2012
Letter of Intent to Participate

Our school intends to participate in the forth year of Hawaiian Electric's Home Energy Challenge, a project involving the partnership between Hawaiian Electric Company and the Hawaii State Department of Education in an effort to encourage energy conservation in our students, at home and at school.

I understand that there are two ways our school could win:

- A. Largest percentage home energy use decrease: \$10,000, \$6,000 and \$3,000 in prizes to the top 3 schools
B. Creating an Energy Conservation Project. 4 winners of \$1,000 each

I understand that the participating Hawaii public compulsory schools on Oahu are encouraged to teach students how to conserve energy at home and school. I understand that we must have at least 20% of the total student population (or a minimum of 50 participants, whichever is larger) with separate residential Hawaiian Electric account numbers participating from the beginning to the end of the Challenge. If after signing this Letter of Intent we find our school is unsuccessful in obtaining or maintaining the minimum amount of participation we will not be able to participate this year and will not qualify to win prize money.

I understand that it is strongly recommended to have at least one school representative attend the Kick-Off Meeting on Saturday, August 27, 2011 (9-11 AM) to pick up program material, review the rules and learn how to implement the program. Meeting location: 932 Ward Ave at the corner of King and Ward.

I have read the Home Energy Challenge Rules and agree to participate accordingly.
